

History

With this program you are able to log changes for the desired basic data type. To activate the logging (history) you have to do the following steps.

Special programs => File management => Modification services => History basic data

type	activated on	Changes	months	active	check
debtors (basic data)	31.07.2015	100	3	<input checked="" type="checkbox"/>	adjust
creditors (basic data)	31.07.2015	100	3	<input checked="" type="checkbox"/>	adjust
debtors (banks)	31.07.2015	100	3	<input checked="" type="checkbox"/>	adjust
creditors (banks)	31.07.2015	100	3	<input checked="" type="checkbox"/>	adjust
User (Basic data)	00.00.0000			<input type="checkbox"/>	
User (Rights)	00.00.0000			<input type="checkbox"/>	
credit limit (debtors)	00.00.0000			<input type="checkbox"/>	
credit limit (creditors)	00.00.0000			<input type="checkbox"/>	
general accounts (basic data)	09.02.2016	100	3	<input checked="" type="checkbox"/>	adjust

Changes	number of data (changes) you want to log
months	How many months do you want to save the history?
active	Activation of the history. On activation the whole basic data will be imported to the login table. So this process can take some time.
adjust	All existing logged data will be deleted concerning to your current settings (changes/months).

To start the report for the logged changes go to

Special programs => File management => Modification services => History protocol

type	Which data do you want to check?
protocol	type of the protocol
date	date from/to (optional)
account	account from/to (optional)
user	user number from/to (optional)
client	client number from/to (optional)
