## General

With the new „Stack management“ functionality you are able to select already posted stacks and show them in list form.

Additional you can reprint a journal of these stacks, check details and delete the whole stack at the push of a button.

Valid only for all stacks from this moment on you have installed an EuroFib update min. version 7.1.1239

## Preparations

### Create role (authority)

Special programs => System administration => Rights administration => Roles

Define a role with one of the following options:

- manage posted stacks (only own)  
With this option you will get a list only of the stacks which you have posted with your EuroFib user.
- manage posted stacks (all)  
With this option you will get a list of all posted stacks from all EuroFib users

number	8 Stack management	creation	02.10.2012	SUP
		change	02.10.2012	SUP

debtors	creditors	booking	cost accounting	Project accounting	AMS	system	cash
		<input type="checkbox"/> posting after blocked period					
		<input type="checkbox"/> posting before blocked period					
		<input type="checkbox"/> edit stack					
		<input type="checkbox"/> gebuchte Stapel verwalten (nur eigene)					
		<input checked="" type="checkbox"/> gebuchte Stapel verwalten (alle)					

## **Allocate the created role to EuroFib users**

Special programs => System administration => Create User

Here you have to allocate the previous defined role to the desired users.

You can find a detailed description for this topic „User administration & Rights“ on our website <http://www.schmidhuber.com> under „Support => Downloads => Documents“.

## Stack management

Posting => Stack management

Here you have the possibility to select the already posted stacks and manage them.

### General

In the **top area** you are able to use several restrictions like type, user and date from/to for the selection process.

If your user has the role „manage only own stacks“ the user restriction will be used automatically.

In the **bottom area** you will get a list of the posted stacks after you click the button „Select stack(s)“.

StpNr	posted on	Zeit	Benutzer	eingelezen am	Zeit	Benutzer	name	1/2	Anz. BuchZeilen
1	02.10.2012	11:37:36	3 / TN	02.10.2012	11:37:26	3 / TN	Batchüberleitung		30
6	02.10.2012	13:29:01	3 / TN	02.10.2012	13:28:52	3 / TN	Tabelle1		10

### Sort the list of stacks

Click the right mouse button in the headline area – here you can define several settings like sorting the list etc.

StpNr	posted on	Zeit	Benutzer	eingelezen am	Zeit	Benutzer	name	1/2	Anz. BuchZeilen
1	02.10.2012	11:37:36	3 / TN	02.10.2012	11:37:26	3 / TN	Batchüberleitung		30
6	02.10.2012	13:29:01	3 / TN	02.10.2012	13:28:52	3 / TN	Tabelle1		10

## Show details of stack (postings)

Click the right mouse button on a stack and choose "detail".

StpNr	posted on	Zeit	Benutzer	einglesen am	Zeit	Benutzer	name	1 / 2	Anz. BuchZeilen
1	02.10.2012	11:37:36	3 / TN	02.10.2012	11:37:26	3 / TN	Batchüberleitung		30
6	02.10.2012	13:29:01	3 / TN	02.10.2012	13:28:52	3 / TN			10

detail

delete

Here you get a detailed view of this stack and all postings. If you click the right mouse button on a posting line you can interact with this posting (e.g. jump to the account sheet or open items list, delete this single posting etc.)

## Delete the whole stack

Click the right mouse button on a stack and choose „delete“.

StpNr	posted on	Zeit	Benutzer	einglesen am	Zeit	Benutzer	name	1 / 2 Anz. BuchZeilen
1	02.10.2012	11:37:36	3 / TN	02.10.2012	11:37:26	3 / TN	Batchüberleitung	30
6	02.10.2012	13:29:01	3 / TN	02.10.2012	13:28	3 / TN	Tabella1	10

detail

delete

After you confirm the security question with „Yes“, EuroFib will start the delete process.

**If it's not possible to delete a posting (e.g. because of an allocation) it will be ignored and the next posting will be deleted.**

Please notice, that this is the reason of **partial deleted stacks**.

The rest of your postings will stay in the stack and you can **check them with the detail view**. If you **try to delete the postings** you will get a detailed error message, why EuroFib isn't able to delete this posting.

### WARNING:

The time for the delete process depends on the amount of data.  
Additional every deleted posting will be written to an own protocol.

## Delete stacks with 0 postings

If you have stacks without postings, you are able to delete them with a click on the right mouse button => Delete (all with 0 posting lines).

This happens if you delete all single postings of one stack with the „Delete posting“ functionality.

StpNr	posted on	Zeit	Benutzer	einglesen am	Zeit	Benutzer	name	2 / 2 Anz. BuchZeilen
1	02.10.2012	11:37:36	3 / TN	02.10.2012	11:37:26	3 / TN	Batchüberleitung	30

## Print protocol for stacks (total)

You have 2 possibilities to print out a total journal of your posted stacks.

- 1) From „Stack management“ directly  
Select the desired stack and click the preview or print symbol.

StpNr	posted on	Zeit	Benutzer	einglesen am	Zeit	Benutzer	name	1/2	Anz. BuchZeilen
1	02.10.2012	11:37:36	3 / TN	02.10.2012	11:37:26	3 / TN	Batchüberleitung		30

- 2) Reports => Journal => Print out, tabpage „Stack“  
Choose the desired stack with F3 and click the preview or print symbol.

Journal

Input Circular Total **Stack**

type: Batchverarbeitung

Stapel Nr: 1
